the first two columns of the table. The third column shows the estimated effect of the treatment on the outcome variable, and the fourth column shows the estimated effect of the treatment on the control variable. The fifth column shows the estimated effect of the treatment on the outcome variable, and the sixth column shows the estimated effect of the treatment on the control variable. The seventh column shows the estimated effect of the treatment on the outcome variable, and the eighth column shows the estimated effect of the treatment on the control variable. The ninth column shows the estimated effect of the treatment on the outcome variable, and the tenth column shows the estimated effect of the treatment on the control variable.

TABLE 1. Summary statistics of the data used in the analysis.

The table shows the mean and standard deviation of the outcome variable, the control variable, and the treatment variable. The first column shows the mean and standard deviation of the outcome variable, the second column shows the mean and standard deviation of the control variable, and the third column shows the mean and standard deviation of the treatment variable. The fourth column shows the mean and standard deviation of the outcome variable, the fifth column shows the mean and standard deviation of the control variable, and the sixth column shows the mean and standard deviation of the treatment variable.

The table shows the mean and standard deviation of the outcome variable, the control variable, and the treatment variable.
